

# EAGLE WATCH

## AI-POWERED OPEN SOURCE INTELLIGENCE

---

*Eagle Watch is an Agentic Orchestrator for Open-Source Intelligence (OSINT)*

At the core of Eagle Watch is a Master Brain that autonomously interprets your search intent to deploy specialized agents across eight intelligence categories, eliminating the burden of manual investigation.

Eagle Watch transforms fragmented data into verified, actionable intelligence, delivering clarity through an integrated workspace and vision board for decision-making.

# EAGLE WATCH INTELLIGENCE CATEGORIES

## SPECIALIZED AGENTS ORCHESTRATED BY A SINGLE MASTER BRAIN

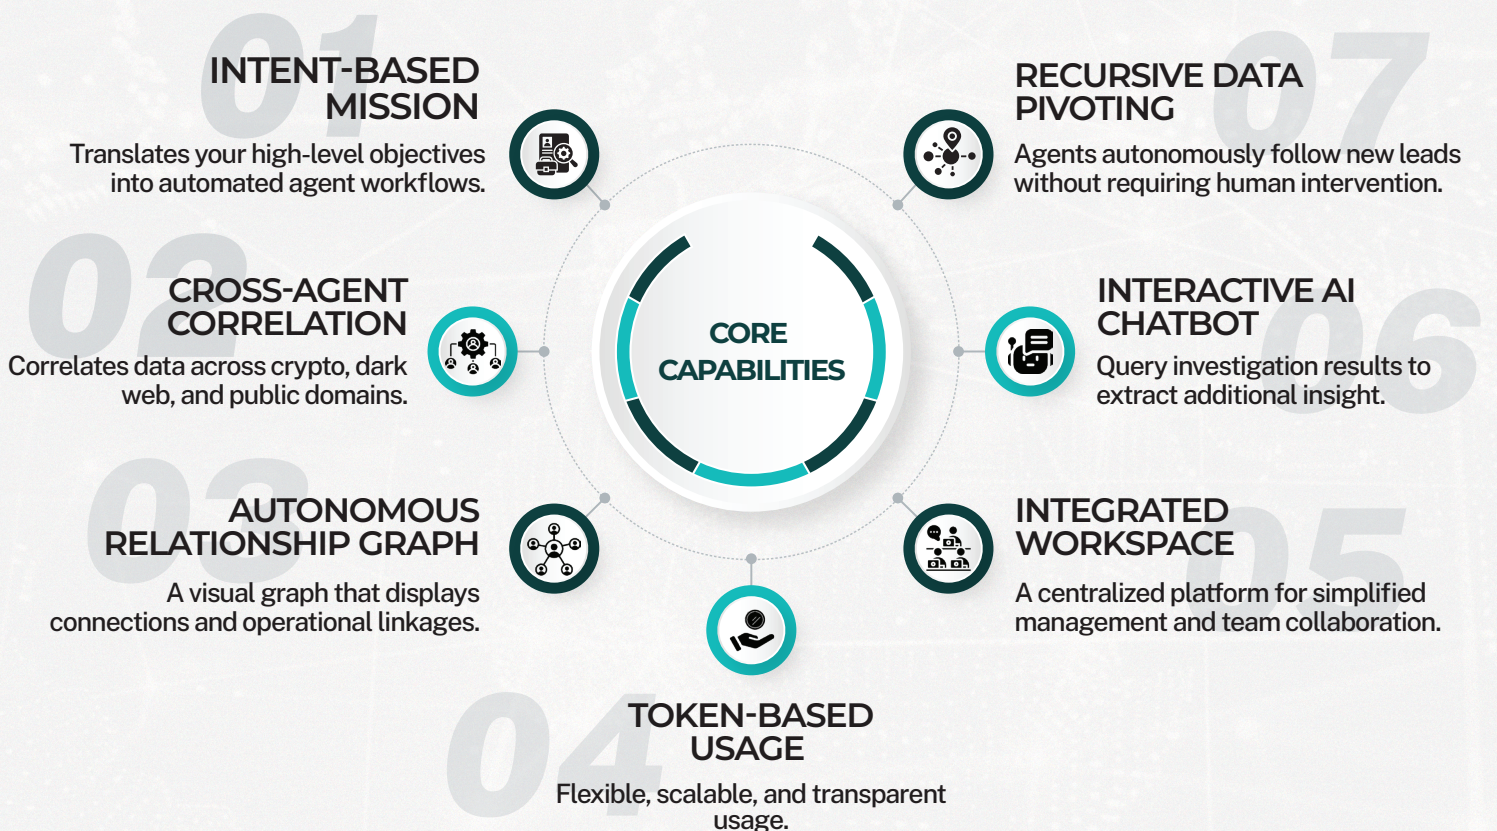

Eagle Watch deploys specialist AI agents across eight intelligence categories, each a master of its own data domain. All agents operate autonomously under the direction of the Alpha Agent and converge into a unified intelligence output.

# CORE FUNCTIONAL CAPABILITIES

The New Standard in Open Source Intelligence.

These core capabilities represent the functional power of the Eagle Watch Agentic AI ecosystem.

## OPERATIONAL USE CASES

### Identity Resolution

Autonomously identify linked accounts and aliases across the web.

### Shell & UBO Intel

Trace ownership layers and shell structures to reveal true beneficiaries.

### Asset Attribution

Link crypto wallets, domains, and technical assets to real-world identities.

### Relationship Graph

Connect fragmented data into a single visual graph to see the connections.
